

SALT SPREADER

A SMARTER WAY TO SPREAD SALT

SCAN FOR MORE INFO

THE BOTTLENECK ISN'T PLOWING. IT'S SALT LOGISTICS.

Stop running salt during the storm. Stage it on-site before the storm. Keep trucks focused on routes and use skid steers to service the sites faster.

10.0'-40.0'
SPREAD WIDTH

2600 LB
LOADER OPERATING CAPACITY

THE SPREADER

- Front-mount design for better visibility
- Dual Spinners deliver a uniform spread to both sides
- Dual augers with chains agitate material & break up clumps
- Adjustable spread width
- Seal-protected motor with nickel-plated shaft resists corrosion

THE TOTE

- 3/4-yard poly tote
- Holds 1,600–2,000 lbs. of salt
- Weather resistant
- Stackable and lockable

ONSITE, OUT OF MIND.

Beat the storm before it even starts. Stage your salt in weatherproof totes ONSITE.
Less driving, more plowing, fewer callbacks.

2. MOUNT

3. SALT

WHY CONTRACTORS SWITCH

\$ PROFIT

Reduce the number of dedicated salt trucks needed and put existing skid steers to work year-round.

←→ CONTROL

Adjust spread widths from 10'–40' to place material where it's needed and reduce waste.

👥 LABOR

Utilize skid steer operators instead of relying solely on CDL drivers to improve staffing flexibility.

🛡️ RELIABILITY

Corrosion-resistant motor components help prevent failures and keep you spreading season after season.

PROVEN PERFORMANCE

- 40–50% Faster Than Traditional V-Box Salters
- 20–30% Less Salt Used
- Spread 1 Acre in Approximately 2 Minutes
- Only 1.5 Yards of Salt for a 10-Acre Walmart Lot*

**Field-tested at GM Outdoor Services, Elk River Walmart using a Bobcat S650.*
